

- DRUPA SPECIAL -

COMPETENCE IN FINISHING

BILLHÖFER

Jowat
Klebstoffe

Under the headline "Competence in Finishing", Billhöfer, Jowat and Folien Company made a very successful joint presentation at Drupa 2008.

.....**Data**.....**and**.....**Facts**.....

Drupa 29.5. - 11.6.08
Visitors: 391,478
Proportion from abroad:
59 % from 138 countries
Atmosphere: positive
Weather: 20 - 29°

Billhöfer stand 480 m²
1987 visitors
from 69 countries
Sales completed to customers from Japan,
Germany, Portugal, Denmark, Turkey,
UAE, Armenia, Holland, Dubai

Innovation in the service of print finishing -

Billhöfer proved this clearly with their demonstration machines

New: EK-HighLine

- Water-based laminating machine
- Applicator rollers for exact dosing of even the smallest amounts of adhesive
- Hot-knife separator with optimum cut precision
- Output up to 80 m/min (Thermo 100 m/min)
- Power consumption approx. 40 kW

New: SF-TopLine

- PUR adhesive application using extrusion nozzles 3 - 15 g/m²
- Problem-free lamination of freshly printed sheets /oil-based
- Non-stop system for feeder + delivery
- Output up to 100 m/min
- Power consumption approx. 30 kW

Reliable laminating and problem-free further processing! The new SF-TopLine laminating system meets these requirements

Extensive tests (including some by independent institutes) confirm:

- Thermoplastic PUR adhesive (tried and tested in book production)
- Environmentally friendly laminating technology
- Reliable laminating on freshly printed sheets / oil based
- High initial bond strength
- Optimum results in further processing:
cut strength, inline embossing, grooves, hot foil printing and relief stamping, crease burn-in etc.

We will be happy to send you test results and further information on request.

SF-TopLine = The solution to the problems of print finishing!

New: EK-TrendLine

- Water-based laminating machine
- Approx. 400 machines in use worldwide
- Now alternatively also available with separate drying and laminating rollers (FK system)
- Output up to 60 m/min
- Power consumption approx. 20 kW

New: TH-CompactLine

- Thermo laminating machine for all types of film
- With inline embossing station
- Hot-knife separator with optimum cut precision
- Output up to 60 m/min
- Power consumption approx. 25 kW

There was also a lot of interest in other products from the Billhöfer range, such as varnishing machines, high gloss calendars, window laminating machines, thermal embossing systems etc.

To summarise, the two weeks at Drupa were hard work, but highly successful!

We will always be happy to supply you with more detailed product information, and we would like to extend a warm invitation for you to visit us in Nuremberg. The following machines will be ready for demonstrations:

EK-HighLine = 21.07. – 25.07.2008 and **SF-TopLine = 05.08. – 08.08.2008**

We would be very pleased to welcome you at our headquarters!
