TopHeat Oven Concept at PS PrintService

Installed concept:
3 Billhöfer coating lines – 1 incinerator,
Line 3 operated without gas consumption

BILLHÖFER ENERGY FORUM 28th to 29th October 2008

A range of can makers from around Europe followed our invitation to Nuremberg to inform themselves on the latest energy saving features developed by Billhöfer.

A presentation at our own Conference Centre was followed by a visit at PS-PrintService to see the latest heating concept in operation. Here from a total of 3 coating lines 1 line is operated without gas consumption (see screenshot on the left) by using one of Billhöfer's new concepts, **TopHeat**.

With possible energy savings of up to more than 50% all options available from Billhöfer, called **BilloFlex**, **BilloTherm**, **DuoHeat**, **TopHeat**, have found great acceptance among all visitors.

Over a dozen of active enquiries and projects are the proof that energy saving is on everybody's agenda and that Billhöfer has the right products and features on hand.

For those who have not been able to attend the Forum a brochure including a description of all features is available. For the assessment of the possible saving Billhöfer has developed a questionnaire which can be requested as well to get a first impression.

Please send your request to: verkauf@billhoefer.de to start saving.

Gas Consumption for each line

Gas Consumption Incinerator

See you in Kuala Lumpur
01 – 03 December 2008
at the
Asia **CanTech** Conference

IPA Conference, Istanbul 23 – 24 October 2008

Billhöfer's Energy Forum presentation was first held at the Energy Saving Meeting of IPA's technical committee thanks to an invitation received to contribute to the theme of the meeting. All present members acknowledged that the energy balance can be improved in their plants and measures need to be taken to counter rising cost from high gas prices.

BILLHÖFER goes Asia!!!

From 1st December 2008 Billhöfer will have an own representative based in Singapore, Asia within the agency office of Global SysTech, Billhöfer's current agent in SE-Asia. This will immensely improve sales and customer support with shorter response times and local support. **Harald Moyrer**, previously Sales Manager Metal Decorating at Billhöfer will be based in Singapore offering commercial assistance and first aid technical support for Asia & Australia. His new email address will be: hm@globalsystemtech.com.sg. Phone and fax numbers will follow shortly.
